

TANTIMBER

TANTIMBER THERMOWOOD® AYOUS CLADDING

Tantimber Ayou's Claddings offer a blend of simplicity, durability, and elegance, making Thermally Modified Ayou's an excellent choice for outdoor or indoor cladding applications. The enhanced durability, ease of installation, and knotless texture make ThermoWood Ayou's Claddings suitable for various architectural projects, enhancing the overall aesthetics and longevity of buildings.

 **HOLBROOK**
LUMBER COMPANY

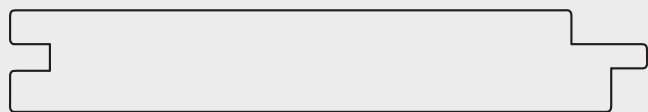

Tantimber ThermoWood® Ayous

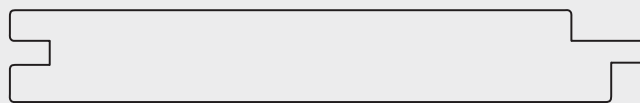

The wood species Ayous is known for its easily processable structure and lightness, making it a preferred choice for cladding applications. Its ease of handling simplifies the installation process. Tantimber ThermoWood® Ayous claddings, thanks to their low moisture exchange, offer maximum durability even in severe climate conditions. Tantimber Ayous claddings can withstand outdoor exposure and resist weathering, ensuring a long service life.

Holbrook Lumber proudly stocks the following Tantimber ThermoWood® Ayous cladding profiles:

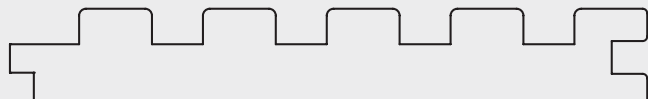

1X6 NISA

1X8 NISA

1X6 NORA-T

5/4X6 TRIPLE ROMBUS
